DETAILED ACTION

This office action is in response to the amendment filed 8/28/02.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ning et al (5,231,299) in view of Hunter et al (4,631,803).

Ning et al teach a flash memory comprising a floating gate 22; a trench 12, 14; and a control gate 24. See Fig. 4 and accompanying text.

However, Ning et al do not teach that there are two conformal layers lining the inside walls of the trench.

Hunter et al teach a STI structure wherein there are two conformal layers lining the inside walls of the trench and wherein a first conformal lining 38 comprises oxide having a thickness between about 200 to 450 Angstroms (col. 3, lines 40-42) and a second conformal lining 40 comprises nitride having a thickness between about 300 to 600 Angstroms (col. 3, lines 45-48). See Fig. 2 and accompanying text.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the structure taught by Ning et al by forming two conformal layers lining the trench in order to reduce the formation of the vertical bird's beak structure in the trench (see Hunter et al, col. 3, lines 21-24).

Response to Arguments

Applicant's arguments filed 8/28/02 have been fully considered but they are not persuasive.

Applicant's argument that the Hunter et al reference teaches four layers with a large combined thickness is not in commensurate scope with the claim. The claim recites two conformal lining layers with a relatively small combined thickness. However, the claim does not preclude additional lining layers. Therefore, applicant's argument is not found persuasive.

In response to applicant's argument that none of the references address the problem of "smiling" effect on coupling between the floating gate and the source, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the suggestion to

combine the references is found in the references themselves (see the last paragraph of the above rejection).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
